SUMMARY

Full-Stack Developer with experience building web applications using React, Node.js, and MongoDB. Passionate about creating practical digital solutions and applying data-driven thinking to solve real-world problems through modern web technologies.

SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Responsive Design

Backend & Database: Node.js, MongoDB, MySQL

Data Science: Python, ML, Excel, Data Analysis

Tools: Git, GitHub, VS Code

EDUCATION

BACHELOR OF ENGINEERING: INFORMATION TECHNOLOGY

Expected in 2027

LDRP INSTITUTE OF TECHNOLOGY AND RESEARCH,

Sector-15, LDRP-ITR, Gandhinagar

CGPA: 8.37/10 – June 2026 (Present)

- Completed an Advanced Course on Green Skills and AI (Skills4Future Program, Dec); Applied machine learning concepts through practical projects focused on solving sustainability-related challenges.
- Explored no-code AI platforms to rapidly prototype and validate solution ideas.
- Collaborated with a team during Smart India Hackathon to develop innovative solutions for real-world problem statements.

EXPERIENCES

Visves Advance Engineering Pvt. Ltd. – Full Stack Intern

June 2026 (Present)

- Developed a desktop calibration management system with 8+ integrated modules, including authentication, report generation, barcode tracking, and calibration analytics.
- Automated PDF-based calibration report generation with structured data validation, improving documentation accuracy and consistency.
- Implemented barcode-enabled equipment tracking and SQLite-backed data management, streamlining access to historical calibration records.
- Built 4+ analytical dashboards for monitoring calibration activities, equipment status, and report trends across the organization.

ACTIVITIES

- Coordinated decoration planning and execution for the college annual tech event, helping create an organized and engaging experience for participants.
- Supported technical event operations by managing equipment setup and logistics, ensuring smooth execution of sessions and activities.

PROJECTS

Job Recommendation Platform

Built a full-stack web application using React, Node.js, MongoDB, KNN for skill matching and REST APIs with authentication, role-based dashboards, and real-time chat features.

Tech Stack: React, JavaScript, Machine Learning, MongoDB

Crop Recommendation Platform

Simplified crop planning decisions by building an AI-assisted recommendation platform that combines weather insights, multilingual accessibility, and personalized agricultural guidance.

Tech Stack: React, TypeScript, PostgreSQL, Gemini AI
