Portfolio: <https://abhiisdev.vercel.app/> | Explore my projects, technical skills, and development experience.

SUMMARY

Frontend-focused developer with hands-on experience building **responsive, component-based applications using React.js, JavaScript, TypeScript, and Tailwind CSS**. Experienced in **full-stack development**, REST API integration, state management, and database-driven applications.

SKILLS

Frontend: React.js, JavaScript, TypeScript, HTML5, CSS3, Responsive Design, Tailwind CSS

State & Data: Zustand, REST APIs, JSON, TanStack Query

Backend & Database: Node.js, REST API Integration, MongoDB, SQLite

Programming & Data: Python, Machine Learning, Data Analysis, Excel

Tools: Git, GitHub, VS Code

EDUCATION

LeelaBen Dashrathbhai Ramdas Patel (LDRP-ITR), Gandhinagar

2023-2027

Bachelor of Engineering in Information Technology

CGPA: 8.37/10 – June 2026 (Present)

Sahjanand School Of Achiever, Gandhinagar

April 2022 – July 2023

Physics, Chemistry, Mathematics

percentage: 56.92

- Completed an Advanced Course on Green Skills and AI (Skills4Future Program, Dec); Applied machine learning concepts through practical projects focused on solving sustainability-related challenges.
- Explored no-code AI platforms to rapidly prototype and validate solution ideas.
- Collaborated with a team during Smart India Hackathon to develop innovative solutions for real-world problem statements.

EXPERIENCES

Visves Advance Engineering Pvt. Ltd. – Full Stack Intern

June 2026 – July 2026

- Developed a desktop calibration management system with 8+ integrated modules, including authentication, report generation, barcode tracking, and calibration analytics.
- Automated PDF-based calibration report generation with structured data validation, improving documentation accuracy and consistency.
- Implemented **barcode-enabled equipment tracking and SQLite-backed data management**, along with 4+ **analytical dashboards** for monitoring calibration activities, equipment status, and report trends.

ACTIVITIES / CERTIFICATIONS

- Coordinated **college technical-event planning, decoration, equipment setup, and logistics**, ensuring smooth execution of sessions and an engaging experience for participants.
- NPTEL – The Joy of Computing using Python – 63%**

PROJECTS

- Higher Education Admission Guide (HEAG)**
Built a full-stack web application using React, TypeScript, Tailwind CSS, Node.js and MongoDB for institution discovery and admission guidance, with REST APIs, state management, real-time database-driven data and personalized admission recommendations.
Tech Stack: React, TypeScript, Tailwind CSS, Node.js, MongoDB, Zustand, TanStack Query
- Crop Recommendation Platform**
Simplified crop planning decisions by building an AI-assisted recommendation platform that combines weather insights, multilingual accessibility, and personalized agricultural guidance.
Tech Stack: React, TypeScript, PostgreSQL, Gemini AI
